**The Oxford Handbook of Internet Studies** Sep 09 2020 Internet Studies has been one of the most dynamic and rapidly expanding interdisciplinary fields to emerge over the last decade. The Oxford Handbook of Internet Studies has been designed to provide a valuable resource for academics and students in this area, bringing together leading scholarly perspectives on how the Internet has been studied and how the research agenda should be pursued in the future. The Handbook aims to focus on Internet Studies as an emerging field, each chapter seeking to provide a synthesis and critical assessment of the research in a particular area. Topics covered include social perspectives on the technology of the Internet, its role in everyday life and work, implications for communication, power, and influence, and the governance and regulation of the Internet. The Handbook is a landmark in this new interdisciplinary field, not only helping to strengthen research on the key questions, but also shape research, policy, and practice across many disciplines that are finding the Internet and its political, economic, cultural, and other societal implications increasingly central to their own key areas of inquiry.

**The Governance of Land Use in France Case studies of Clermont-Ferrand and Nantes Saint-Nazaire** Jun 06 2020 This report examines how land is governed in France. It describes the laws, policies and practices that shape spatial and land-use planning in the country as a whole, and provides a detailed assessment of Clermont-Ferrand and Nantes Saint-Nazaire.

The Digest of Justinian Jul 28 2019 When Justinian became sole ruler of the Byzantine Empire in A.D. 527, he ordered the preparation of three compilations of Roman law that together formed the Corpus Juris Civilis. These works have become known individually as the Code, which collected the legal pronouncements of the Roman emperors, the Institutes, an elementary student's textbook, and the Digest, by far the largest and most highly prized of the three compilations. The Digest was assembled by a team of sixteen academic lawyers commissioned by Justinian in 533 to cull everything of value from earlier Roman law. It was for centuries the focal point of legal education in the West and remains today an unprecedented collection of the commentaries of Roman jurists on the civil law. Commissioned by the Commonwealth Fund in 1978, Alan Watson assembled a team of thirty specialists to produce this magisterial translation, which was first completed and published in 1985 with Theodor Mommsen's Latin text of 1878 on facing pages. This paperback edition presents a corrected English-language text alone, with an introduction by Alan Watson. Links to the three other volumes in the set: Volume 2 [Books 16-29] Volume 3 [Books 30-40] Volume 4 [Books 41-50]

How Political Actors Use the Media Jun 18 2021 This book investigates how individual politicians and political

parties strategically make use of the media to reach their political goals. Looking beyond a purely Americentric viewpoint, the chapters present data from more than ten Western democracies to argue that the media are both a source of information and an arena for political communication. This double functional role of the media is examined from both a theoretical and an empirical perspective, including chapters dealing with different aspects of politics - from campaigning to law making - and within different political contexts. The role of the news media is discussed from the perspective of the political actor, focusing on both the opportunities and the constraints the news media provide, resulting in a multidisciplinary text that will appeal to students and scholars of both communication and political science.

*Clients and Users in Construction* Feb 12 2021 Clients have been identified as critical for building delivery but have been under-researched with only a few studies about them. This book seeks to address this gap. A deeper look into the nature of construction clients and their relation to building users exposes more fundamental questions related to the activity of building and the activity in the building. These fundamental questions include 'How do clients get what they want?', 'How do clients cope with the building process?', and 'How are clients being shaped by building(s)?'. This book on clients and users is structured around three main themes: Agency is concerned with the classical agency/structure dichotomy on actions, roles and responsibilities or, put differently, whether actors can act freely or are bound by structural constraints. Governance is related to the interplay between clients and the supply system: clients govern the supply system but are at the same time governed by the supply system through different processes and mechanisms. Innovation deals with construction innovation and what part clients and users play in this struggle between change and stability. The book includes theoretical and conceptual frameworks on what constitutes clients and users as well as case studies on R&D themes of relevance to practice.

**Exploring Sustainable Land Use in Monsoon Asia** Oct 03 2022 This book presents the outcome of the Towards Sustainable Land Use in Asia (SLUAS) project, which was the pilot undertaking for development in a series of projects on land use. Monsoon Asia, with its huge and still increasing population and rapid socioeconomic changes, is regarded as a major hot spot of global change in general and of land use change in particular. The major issues include urbanization, rural development, land-related problems such as food problems, and disasters in the context of global change and sustainability. Future Earth, the new international research framework established by International Council for Science (ICSU), the International Social Science Council (ISSC), and other international academic or funding organizations for a sustainable world, has chosen the Global Land Project (GLP) as one of the first such international projects it has endorsed that originated from International Geosphere/Biosphere Programme (IGBP) and/or International Human Dimensions Programme (IHDP). This endorsement is a clear indication of the importance of the issues related to land use and its changes. Land use change is an essential driving force of environmental change, a result of socioeconomic and environmental changes, and is a major environmental change itself. Because of this complex and multifaceted nature and the difficulties in obtaining relevant data with historical depth, this phenomenon has not been studied fully in the context of global change or sustainability. It is hoped that this book is of use to those who are concerned about the present and future land use in the world.

Place-Based Evaluation for Integrated Land-Use Management Jun 30 2022 In recent years, there has been an increasing emphasis placed on local and regional integration in major planning projects and infrastructure development including roads, rail and waterways. This emphasis is not only on integrating various projects, but also integrating them with related issues such as housing, industry, environment and water. In other words, land-use planning and infrastructure management have become more spatially-oriented. This book brings together experts in the fields of spatial planning, land-use and infrastructure management to explore the emerging agenda of spatially-oriented integrated evaluation. It weaves together the latest theories, case studies, methods, policy and practice to examine and assess the values, impacts, benefits and the overall success in integrated land-use management. In doing so, the book clarifies the nature and roles of evaluation and puts forward guidance for future policy and practice.

**Land Use in Australia** Apr 28 2022 Land Use in Australia: Past, Present and Future, is a compilation of invited chapters from Australia's leading specialists in land use policy and planning and land management. Chapters present many widely recognised issues involved in Australia's land use policy and planning, including limited understanding and poor awareness of: the rich history of poor decisions on land use planning and management across different levels of government the discontinuities between providers of national biophysical information the tools, data and

information to improve national land use decision-making outcomes the poor synthesis and integration between science to policy to natural resource management and resource condition the benefits of land use practitioners engaging in connection, cooperation, mutual inquiry and collective social learnings. The aims of the book are threefold: 1) provide a review of the current status of land use policy and planning in Australia; 2) provide a resource to inform and influence the development of land use policy and planning; and 3) provide a sound contribution to Australia's public-private land use debates in the future. The audience for the book includes government and non-government land management agencies from state and national bodies, universities and researchers.
