Israel Denial May 16 2021 A work of "rigorous intellectual inquiry" critiquing the BDS movement in academia (Jewish Journal). Israel Denial is the first book to offer detailed analyses of the work faculty members have published—individually and collectively—in support of the Boycott, Divestment, and Sanctions (BDS) movement; it contrasts their claims with options for promoting peace. The faculty discussed here have devoted a significant part of their professional lives to delegitimizing the Jewish state. While there are beliefs they hold in common—including the conviction that there is nothing good to say about Israel—they also develop distinctive arguments designed to recruit converts to their cause in novel ways. They do so both as writers and as teachers; Israel Denial is the first to give substantial attention to anti-Zionist pedagogy. No effort to understand the BDS movement's impact on the academy and public policy can be complete without the kind of understanding this book offers. Markenkäufer - Die Anforderungen an das Marketing der Unternehmen werden immer komplexer. Um entscheidende Wettbewerbsvorteile zu erlangen, setzen immer mehr Unternehmen auf gelebtes Relationship Marketing und Serviceorientierung. Ein bereits bewährtes Instrument zur Kundenbindung mittels Beziehungsmanagement ist das Call Center als zentrale Anlaufstelle für den Kunden. Technologien wie Automatic Call Distribution (ACD), Computer Telephony Integration (CTI) oder Interactive Voice Response (IVR) ermöglichen ein kundenindividuelles Treatment und garantieren höchste Kundenzufriedenheit beim telefonischen Kontaktgespräch. Neben Call Center gewinnt der Bereich der Online Kommunikation in Sachen

Relationship Marketing zunehmend an Bedeutung: Interaktivität, Multimedialität, Vernetzungspotential, Real-time Kommunikation und Globalität machen das Medium zu einem enorm effektiven Beziehungsmarketing-Tool. Die Diplomarbeit beschreibt, ausgehend von den Grundgedanken des Relationship Marketing, wie die beiden Instrumente Internet und Call Center integriert werden können und welche Effekte dies auf professionelles Beziehungsmanagement hat. Der Autor entwickelt das Konzept des Online Service Centers, welches in Zukunft sämtliche Kundenbeziehungen managen kann: Multimediale Kommunikation auf Basis der WebSite, professioneller Einsatz von Email im Inbound- und Outbound-Bereich sowie effektive Selfservice-Features machen das Online Service Center zur umfassenden Schnittstelle für Unternehmen und Kunde und ermöglichen in bisher nie dagewesener Weise individuelle Kundenbeziehungen im Massenmarkt. Wie solche Online Service Center schon bald in der Praxis aussehen könnten, wird anhand einiger anschaulicher Szenarien (z.B. Reisebranche) erläutert. Der Autor geht schließlich darauf ein, welche neuen Gesetze die digitale Wirtschaftsordnung der Zukunft steuern und warum das Online Service Center insbesondere aus Marketing-Überlegungen ein logischer und notwendiger Bestandteil innerhalb der Vernetzung von Kunden und Unternehmen wird.
