New Fundamental Mathematics Jun 27 2019 "This combined book is written for the new Year 12 Mathematics Advanced + Extension 1 courses, which are being introduced into the NSW syllabus in 2020. This book has been written with two main objectives: it can be used as a textbook for classroom use, as well as a step-by-step resource to be used independently by students for their own self-study purposes. This book provides sufficiently clear

explanations about each topic in the syllabus, with worked out examples and alternative methods, where applicable Questions are categorised by topic and graded from easy to hard, to help guide students in their learning. Each chapter also contains a set of review exercises and challenge problems, as well as fully worked solutions for each question. The review exercises will help consolidate students' skills and knowledge, while improving their competence and confidence. The book also features challenge problems. While they may extend beyond the syllabus, they are designed to provide extra stimulus for highly motivated students and increase confidence for the harder questions in the Higher School Certificate examination." -- Publisher's website.

A+ HSC Year 12 Mathematics Standard 2 Study Notes Feb 13 2021 A+ HSC Mathematics is a new series of Study Notes and Practice Exams books written by experienced teachers, HSC markers and writers who have taught the new courses.
