Environmental Regimes in Asian Subregions Aug 26 2019 Informed by international law, international relations and environment management scholarship, this interdisciplinary analysis of environmental regimes in Asian subregions proposes a new regime for the Himalayas and Tibetan Plateau based on China's cooperation with its south Asian neighbors.

Handbook of the Convention on Biological Diversity Apr 02 2020 First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

Handbook of the Convention on Biological Diversity Dec 31 2019 In 1992, at the Earth Summit in Rio, the United Nations adopted the Convention on Biological Diversity (CBD) to agree international measures aimed at preserving the vital ecosystems and biological resources on which we all depend. This is the official handbook to the Convention and presents all the most important information about the CBD, including a guide to the decisions adopted and to ongoing activities. It is an essential resource for all the governments, intergovernmental agencies, NGOs and conservation bodies and researchers working in this area. Included with the book is a fully indexed and cross-referenced CD-ROM containing all the relevant background material to the Convention, linked to relevant decisions and other sources of information.

Places of Refuge for Ships Feb 10 2021 Written by scholars and practitioners, this work consists of 20 multidisciplinary chapters addressing the law, policy and management aspects of the problem of places of refuge for ships in need of assistance. Specific chapters focus on the experiences and approaches of Australia, Belgium, Canada, Denmark, Germany, United Kingdom and United States.

Information Operations Army, Navy, Air Force, Marines Jul 26 2019 Information Operations is even more important as nations like China move from "information warfare" towards what they call "intelligentized" warfare. Information Operations, serves as the foundational doctrine for Army, Navy, Marines and Air Force joint information operations. The purpose of this book is to bring together all five manuals in one document to better align with joint doctrine, while recognizing the unique requirements of information operations in support of the land, sea and air force. This manual provides overarching guidance to effectively integrate information operations into the operations process in order to create decisive effects in the information environment. This book contains: DoD Directive 3600.01 Information Operations (IO) Army Field Manual (FM) 3-13, Information Operations Air Force Doctrine ANNEX 3-13, Information Operations Navy NWP 3-13, Navy Information Operations Marine Corps MCWP 3-40, Marine Air-Ground Task Force Information Operations Joint Publication JP 3-13, Information Operations Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers.

[The Law of Nature Conservation](#) Sep 27 2019 Providing a detailed account of the law of nature conservation, this book reviews and discusses the way in which the law promotes the conservation of species of animal, bird, and plant, and how it protects natural habitats for protected species. Using an interdisciplinary approach, the book sets nature conservation in its economic and scientific context. It explains how the law reconciles the public interest in promoting biodiversity and the conservation of species and habitats, on the one hand, and the private property rights of landowners and other resource appropriators on the other. The book offers an illuminating new interpretation of this area of environmental regulation using a resource allocation model of property rights to explain how legal and economic instruments for promoting nature conservation work in practice. The analysis covers all recent legislation and case law - including the Marine and Coastal Access Act 2009, the Conservation of Habitats and Species Regulations 2010 and the 2012 National Planning Policy Framework. The book will serve as a critical guide to UK nature conservation law for those working in the system, and a valuable reference point on the UK's approach to the area for environmental lawyers and policy-makers overseas.

[The IMLI Manual on International Maritime Law](#) Nov 21 2021 This three-volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this a uniquely comprehensive study of this fundamental area of international law. Volume III is devoted to the marine environmental law and maritime security law. The first part of Volume III deals in depth with issues of most fundamental importance in the contemporary world, namely how to protect the marine environment from pollution from ships, land-based sources, seabed activities, and from or through air. In explaining these types of pollution, various conventions concluded under the auspices of the IMO (such as MARPOL 73/78 and the 1972 London Convention) and soft law documents are analysed. The volume also includes chapters on the conventions relating to pollution incident preparedness, response, cooperation, and the relevance of regional cooperation. It additionally discusses liability and compensation for pollution damage. The second part of volume III examines an issue of increasing importance in a world threatened by terrorism, piracy, and drug-trafficking. Chapters in this part cover the topics of piracy; stowaways; human trafficking; illicit drugs; terrorism; military uses of the sea; and new maritime security threats, such as the illegal dumping of hazardous wastes and toxic substances, as well as illegal, unreported, and unregulated fishing.
