Discombobulation Oct 09 2020 Wayne Rudolph Davidson delves deeper into his family history in this second book of his When Clans Collide trilogy. Exploring his own personal branch that stems from the genealogical trunk of the distinguished Davidson family tree, he writes from the perspective of an African-American male born in the post-World War II era caught in a firestorm of extraordinary social change, civil disturbance, and a burgeoning

drug culture. His life runs in tandem with the migration of African-Americans from the rural South to urban centers in the North and historic events such as the assassinations of President John F. Kennedy, Malcolm X, the Rev. Martin Luther King Jr. and Senator Robert F. Kennedy. He seamlessly blends his family genealogy and his own mistakes and triumphs with American history. From being an unemployed autoworker living and working in a dark tunnel to positions of responsibility and authority as a member of the U.S. Army in strategic places around the world, in this book, the author gets a chance rarely given to African-American men: to tell his story before his peers instead of before a magistrate.

Democracy is the Answer Aug 26 2019 As the Egyptian revolution unfolded throughout 2011 and the ensuing years, no one was better positioned to comment on it—and try to push it in productive directions—than best-selling novelist and political commentator Alaa Al-Aswany. For years a leading critic of the Mubarak regime, Al-Aswany used his weekly newspaper column for Al-Masry Al-Youm to propound the revolution's ideals and to confront the increasingly troubled politics of its aftermath. This book presents, for the first time in English, all of Al-Aswany's columns from the period, a comprehensive account of the turmoil of the post-revolutionary years, and a portrait of a country and a people in flux. Each column is presented along with a context-setting introduction, as well as notes and a glossary, all designed to give non-Egyptian readers the background they need to understand the events and figures that Al-Aswany chronicles. The result is a definitive portrait of Egypt today—how it got here, and where it might be headed.

The Internet Is Not the Answer Sep 07 2020 The renowned Internet commentator and author of How to Fix the Future "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. The Internet Is Not the Answer, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, The Internet Is Not the Answer is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson, #1 New York Times – bestselling author

Jihadism Transformed Jan 12 2021 Jihadist narratives have evolved dramatically over the past five years, driven by momentous events in the Middle East and beyond; the death of bin Laden; the rise and ultimate failure of the Arab Spring; and most notably, the rise of the so-called Islamic State. For many years, al-Qaeda pointed to an aspirational future Caliphate as their utopian end goal - one which allowed them to justify their violent excesses in the here and now. Islamic State turned that aspiration into a dystopic reality, and in the process hijacked the jihadist narrative, breathing new life into the global Salafi-Jihadi movement. Despite air-strikes from above, and local disillusionment from below, the new caliphate has stubbornly persisted and has been at the heart of ISIS's growing global appeal. This timely collection of essays examines how jihadist narratives have changed globally, adapting to these turbulent circumstances. Area and thematic specialists consider transitions inside the Middle East and North Africa as well as in South Asia, sub-Saharan Africa and Europe. As these analyses demonstrate, the success of the ISIS narrative has been as much about resonance with local contexts, as it has been about the appeal of the global idea of a tangible and realised caliphate.

Law and Revolution Feb 10 2021 What is the effect of revolutions on legal systems? What role do constitutions play in legitimating regimes? How do constitutions and revolutions converge or clash? Taking the Arab Spring as its case study, this book explores the role of law and constitutions during societal upheavals, and critically evaluates the different trajectories they could follow in a revolutionary setting. The book urges a rethinking of major categories in political, legal, and constitutional theory in light of the Arab Spring. The book is a novel and comprehensive examination of the constitutional order that preceded and followed the Arab Spring in Egypt, Tunisia, Libya, Morocco, Jordan, Algeria, Oman, and Bahrain. It also provides the first thorough discussion of the trials of former regime officials in Egypt and Tunisia. Drawing on a wide range of primary sources, including an in-depth analysis of recent court rulings in several Arab countries, the book illustrates the contradictory roles of law and constitutions. The book also contrasts the Arab Spring with other revolutionary situations and demonstrates how the Arab Spring provides a laboratory for examining scholarly ideas about revolutions, legitimacy, legality, continuity, popular sovereignty, and constituent power.

**The Kurdish Spring** Oct 01 2022 Kurds are the largest stateless people in the world. An estimated thirty-two million Kurds live in "Kurdistan," which includes parts of Turkey, Iraq, Syria, and Iran?today's "hot spots" in the Middle East. The *Kurdish Spring* explores the subjugation of Kurds by Arab, Ottoman, and Persian powers for almost a century, and explains why Kurds are now evolving from a victimized people to a coherent political community. David L. Phillips describes Kurdish rebellions and arbitrary divisions in the last century, chronicling the nadir of Kurdish experience in the 1980s. He discusses draconian measures implemented by Iraq, including use of chemical weapons, Turkey's restrictions on political and cultural rights, denial of citizenship and punishment for expressing Kurdish identity in Syria, and repressive rule in Iran. Phillips forecasts the collapse and fragmentation of Iraq. He argues that US strategic and security interests are advanced through cooperation with Kurds, as a bulwark against ISIS and Islamic extremism. This work will encourage the public to look critically at the post-colonial period, recognizing the injustice and impracticality of states that were created by Great Powers, and offering a new perspective on sovereignty and statehood.

**Law and the Political Economy of Hunger** May 16 2021 This book is an inquiry into the role of law in the contemporary political economy of hunger. In the work of many international institutions, governments, and NGOs, law is represented as a solution to the persistence of hunger. This presentation is evident in the efforts to realize a human right to adequate food, as well as in the positioning of law, in the form of regulation, as a tool to protect society from 'unruly' markets. In this monograph, Anna Chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law's role in the context of hunger as exclusively remedial. The book takes as its starting point claims that financial traders 'caused' the 2007-8 global food crisis by speculating in financial instruments linked to the prices of staple grains. The introduction of new regulations to curb the 'excesses' of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem. Chadwick investigates a number of different legal regimes spanning public international law, international economic law, transnational governance, private law, and human rights law to gather evidence for a counterclaim: law is part of the problem. The character of the contemporary global food system—a food system that is being progressively 'financialized'—owes everything to law. If world hunger is to be eradicated, Chadwick argues, then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry.

The Ukraine Conflict Jun 04 2020 It is not hyperbole to suggest that the foundations of post-cold war security in Europe have been badly damaged by the conflict in Ukraine since 2014. Russia's annexation of Crimea and intervention in eastern Ukraine appear to have created a 'simmering' conflict, which may take years to resolve and have profound consequences for the European security environment. This volume explores the various political, economic and social aspects of these profound changes and their wider significance for Europe, bringing together contributions by scholars from across the continent and in various disciplinary fields to offer an authoritative, in-depth examination of the complex causes of the Ukraine crisis and the consequences for Ukrainian statehood, Ukraine's relations with Russia, Russia's own domestic governance and Russia's relations with Europe. This book was originally published as a special issue of Europe-Asia Studies.
