**Narrative and Numbers Jul 21 2021 How can a company that has never turned a profit have a multibillion dollar valuation? Why do some start-ups attract large investments while others do not? Aswath Damodaran, finance professor and experienced investor, argues that the power of story drives corporate value,**

**adding substance to numbers and persuading even cautious investors to take risks. In business, there are the storytellers who spin compelling narratives and the number-crunchers who construct meaningful models and accounts. Both are essential to success, but only by combining the two, Damodaran argues, can a business deliver and sustain value. Through a range of case studies, Narrative and Numbers describes how storytellers can better incorporate and narrate numbers and how number-crunchers can calculate more imaginative models that withstand scrutiny. Damodaran considers Uber's debut and how narrative is key to understanding different valuations. He investigates why Twitter and Facebook were valued in the billions of dollars at their public offerings, and why one (Twitter) has stagnated while the other (Facebook) has grown. Damodaran also looks at more established business models such as Apple and Amazon to demonstrate how a company's history can both enrich and constrain its narrative. And through Vale, a global Brazil-based mining company, he shows the influence of external narrative, and how country, commodity, and currency can shape a company's story. Narrative and Numbers reveals the benefits, challenges, and pitfalls of weaving narratives around numbers and how one can best test a story's plausibility.**

**Comparing Transitions to Democracy. Law and Justice in South America and Europe Sep 10 2020 This present book examines some of the key features of the interplay between legal history, authoritarian rule and political transitions in Brazil and other countries from the end of 20th Century until today. This book casts light on these aspects of the role of law and legal actors/institutions. In the context of transition from authoritarian rule to democratic state, Brazil has produced a significant literature on the challenges and shortcomings of the transition, but little attention has been given to the role of law and legal actors/institutions. Different approaches focus on the legal mechanisms, discourses and practices used by the military regime and by the players involved in the political transition process in Brazil. A comparative perspective that takes into account different political transitions - and their legal consequences - in Europe and Latin America complements the analysis. Part 1 (4 essays) discusses some of the central issues of political transition and legal history in contemporary Brazil, focusing on the time of the transition (and its effects on transitional justice) with different perspectives, from racial and gender issues to constitutional reform and police repression. Part 2 (3 essays) brings the comparative studies on South American experiences. Part 3 (4 essays) analyses different cases of transition to democracy in Chile, Portugal, Spain and Italy. Part 4 (3 essays) proposes a historiographical and methodological approach, considering the politics of time involved in the interplay between political transitions and legal history.**

**Foreign Direct Investment in Central Europe and Differences in Transition between post- communist Central European Economies Sep 22 2021**

**Inhaltsangabe:Introduction: The transition process from a centrally planned to a market economy followed a very different path in East Germany compared to all other former communist countries. The German Democratic Republic acceded the Federal Republic of Germany in 1990, while other former socialist countries in Central and Eastern Europe (CEE) had to start from square one after becoming independent from the USSR. In contrast to other post-soviet countries, East Germany subsequently received massive transfers from the Western part of the country. A significant part of these transfers was invested into infrastructure improvement, while a larger share was spent for consumption, raising the purchasing power in the East of Germany, allowing it to sustain a higher wage level and living standard than would have been economically possible without aid from the West. Twenty years after the breakdown of the iron curtain and the reunification of Germany, the infrastructure in the Eastern part of the country is en par with the West. The East German wage level remains only slightly lower than the Western level (as does productivity), but is significantly higher than in neighbouring post-communist CEE-countries. Because of these differences in economic transition, it can be expected that East Germany attracts a different kind of foreign direct investment compared to other CEE-countries. The objective of this dissertation is to empirically identify the factors affecting foreign direct investment into the region and to discuss the implications of the empirical findings for regional and national economic policy. The region is represented in this paper by East Germany and three of its Central-European neighbour-countries, the Czech Republic, Poland and Hungary. The present study is organised as follows: A brief historical overview of the four economies transition processes will be given in chapter 2. The theoretical background, the methodology and the dataset used are being discussed in section 3. Hypotheses derived from the region s history, economic theory and previous literature on foreign direct investment will be presented in section 4. In section 5 they will be tested and the econometric results identifying the factors affecting foreign investors investment decisions in Central Europe will be discussed. Finally, the**

**Common European Framework of Reference for Languages: Learning, Teaching, assessment May 31 2022** The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

**Europe's Last Dictatorship - U.S. Democratization Efforts in Belarus Mar 29 2022** Seminar paper from the year 2006 in the subject Politics - Miscellaneous, grade: 2,0, Durham University, language: English, abstract: [...] Since its official establishment in 1991, Belarus has struggled with the implementation of democratic policies. The republic is a nominal democracy and was pursuing liberal reforms after gaining independence, however, since his election in 1994, its current president Alyaksandar Lukashenka, was repeatedly able to expand his almost autocratic powers. The fact that most other countries in Eastern Europe have democratized more or less like textbook examples makes Belarus' autocracy a true exception. In this paper, the question will be answered why democratization has so far failed in post-communist Belarus. To answer this question thoroughly, it is indispensable to portrait the pre-transitional history and political climate in communist Belarus (section 2.), as well as the actual transition process starting in 1989 (section 3.). The research then turns to the question of how and to what extent external actors, especially the U.S. and Europe, engaged in democratization efforts (section 4.). Eventually, the analysis of external and internal factors will answer the central question of why democracy failed in Belarus (section 5.). It will be determined whether international efforts have been made effectively and correctly, and also, which domestic factors averted a move towards democracy. The results found in this research indicate that international actors failed to recognize Belarus'

The evaluation of the transitional process in Belarus will be based on primary sources such as official documents published by U.S. and European government authorities. Each article presents the mood system of a specific European language in a way that readers not familiar with this language are able to understand and to interpret the data. The articles contain information on the morphology and semantics of the mood system, the possible combinations of tense and mood morphology, and the possible uses of the non-indicative mood(s). The papers address the explanation of mood from an empirical and descriptive perspective. This book is of interest to scholars of mood and modality, language contact, and areal linguistics and typology.**

**The Struggle for Europe Apr 29 2022 From the ashes of World War II to the conflict over Iraq, William Hitchcock examines the miraculous transformation of Europe from a deeply fractured land to a continent striving for stability, tolerance, democracy, and prosperity. Exploring the role of Cold War politics in Europe's peace settlement and the half century that followed, Hitchcock reveals how leaders such as Charles de Gaulle, Willy Brandt, and Margaret Thatcher balanced their nations' interests against the demands of the reigning superpowers, leading to great strides in economic and political unity. He re-creates Europeans' struggles with their troubling legacy of racial, ethnic, and national antagonism, and shows that while divisions persist, Europe stands on the threshold of changes that may profoundly shape the future of world affairs.**

**The First Farmers of Europe Mar 17 2021 Knowledge of the origin and spread of farming has been revolutionised in recent years by the application of new scientific techniques, especially the analysis of ancient DNA from human genomes. In this book, Stephen Shennan presents the latest research on the spread of farming by archaeologists, geneticists and other archaeological scientists. He shows that it resulted from a population expansion from present-day Turkey. Using ideas from the disciplines of human behavioural ecology and cultural evolution, he explains how this process took place. The expansion was not the result of 'population pressure' but of the opportunities for increased fertility by colonising new regions that farming offered. The knowledge and resources for the farming 'niche' were passed on from parents to their children. However, Shennan demonstrates that the demographic patterns associated with the spread of farming resulted in population booms and busts, not continuous expansion.**

**Migration and Health in Europe Sep 30 2019 "This book can be read by anyone with an interest in migration and health, whether as an advocate for migrants' health, as a student in a health profession, researcher or policy maker. It provides an ample orientation to the field in the European context. Among other important raised issues, it underlines an all too often neglected fact; health is a human right. By involving broad issues and problem areas from a variety of perspectives, the volume illustrates that migration and health is a field that can not be allocated to a single discipline." Carin Björngren Cuadra, Senior Lecturer, Malmö University, Sweden Migrants make up a growing share of European populations. However, all too often their situation is compounded by problems with accessing health and other basic services. There is a need for tailored health policies, but**

**robust data on the health needs of migrants and how best these needs can be met are scarce. Written by a collaboration of authors from three key international organisations (the European Observatory on Health Systems and Policies, the EUPHA Section on Migrant and Ethnic Minority Health, and the International Organization for Migration), as well as leading researchers from across Europe, the book thoroughly explores the different aspects of migration and health in the EU and how they can be addressed by health systems. Structured into five easy-to-follow sections, the volume includes: Contributions from experts from across Europe Key topics such as: access to human rights and health care; health issues faced by migrants; and the national and European policy response so far Conclusions drawn from the latest available evidence Comprehensive information on different aspects of health and migration and how they can best be addressed by health systems is still not easy to find. This book addresses this shortfall and will be of major value to researchers, students, policy-makers and practitioners concerned with migration and health in an increasingly diverse Europe.**

**Early Medieval Europe, 300-1000 Aug 10 2020 In this classic textbook history of early medieval Europe, Roger Collins provides a succinct account of the centuries during which Europe changed from being an abstract geographical expression to a new culturally coherent, if politically divided, entity. This comprehensive new edition explores key topics such as the fall of the Roman Empire, the rise of both Christianity and Islam, the Vikings, and the expansion of Latin Christian culture into eastern Europe. Clear and insightful, this is an invaluable guide to an important era in the history of both Europe and the wider world. This is an ideal companion for students of History or European Studies taking modules on Early Medieval Europe or Europe in Late Antiquity. In addition, this is a useful reference work for postgraduate students, scholars and teachers of early medieval Europe.**

**Nostalgia and Hope Jan 03 2020 This open access book shows how the politics of migration affect community building in the 21st century, drawing on both retrogressive and progressive forms of mobilization. It elaborates theoretically and shows empirically how the two master frames of nostalgia and hope are used in local, national and transnational settings, in and outside conventional forms of doing politics. It expands on polarized societal processes and external events relevant for the transformation of European welfare systems and the reproduction of national identities today. It evidences the importance of gender in the narrative use of the master frames of nostalgia and hope, either as an ideological tool for right-wing populist and extreme right retrogressive mobilization or as an essential element of progressive intersectional politics of hope. **New Political Economy of Energy in Europe Feb 25 2022 This edited collection details and analyses the dramatic changes that the international political economy of energy has undergone in the past decade. This change began with the increasing assertiveness of Russia when the oil price rose above the \$100 mark in 2008. This, combined with the rise of shale oil and gas, made the USA all but self-sufficient in terms of fossil fuels. The collapse of the oil price in 2014-15, Saudi Arabia's new strategy of defending its market share and the increasingly tense and controversial relationship between the West and Russia all worked to further strengthen the geopolitical dimension of energy in Europe. The global result is a world in which geopolitics play a bigger part than ever before; the central question the authors of this volume grapple with is how the EU - and European small states - can deal with this. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

**The Eu as a Foreign and Security Policy Actor** Jun 27 2019 This book studies important aspects of the EU as an international actor. It deals with the EU's foreign and security policies as they have developed in recent years. Institutionally the focus is on the second pillar of the Union, the Common Foreign and Security Policy (CFSP) and its defence component, the European Security and Defence Policy (ESDP). The latter in particular has gone through important developments in recent years, taking the EU into a realm which was largely a no-go area until 1999. The book has sections on theoretical and conceptual aspects: how do we study this subject matter and how do we explain developments? The empirical chapters deal with the EU and its near abroad, mostly Eastern Europe and the Mediterranean. The section on the EU's far abroad includes chapters on relations with America, Asia and Africa. Finally there are chapters looking at particular aspects of ESDP. Despite difficulties the EU is increasingly becoming an international actor. **Does Europe Need One Language? Jun 07 2020 Research Paper (undergraduate) from the year 2008 in the subject Politics - International Politics - Topic: European Union, grade: 2,3, Fontys University of Applied Sciences Venlo, course: European Studies, language: English, abstract: Today the European Union (EU) is home to 497 million people from diverse ethnic, cultural and linguistic backgrounds. The Union is the only organization that unifies so many different countries, more precisely 23 official languages and 27 European nations (Zimmer 2007, p. 20). Driven by the common idea of creating a democratic community and a globally competitive market, the EU strongly corroborates equality of every nation's culture, values and languages. Nevertheless the EU is currently struggling with the discrepancy between cultural and linguistic diversity and the equal integration of every member state. Additionally, the emerging English, as the international lingua franca, seems to put a strain on the peaceful cooperation of all 23 official languages. In view of this unfortunate development the question aroused if Europe needs one common language. The first two segments of chapter 2 are to give an overview of the linguistic situation and the official language arrangements of the EU. The following segment describes the contentious situation of the EU, caused by superior number of languages, high costs and the actual inequality of some official languages. In the first subsection of chapter 3 several reason for adopting only one official language are determined. Thereupon the languages Latin, Esperanto and English are analyzed to examine if one of them is able to function as the European lingua franca. In the last part of chapter 3 a short conclusion on monolingualism is drawn and the effects on the functioning of the EU explained. Based on the previous formulated conclusion, the first segment of chapter 4 for will sum up main reasons for maintaining the European language diversity. In addition the positive attitude of the EU to**

**The Impact of Outsourcing to Middle and Eastern Europe Jan 27 2022 Seminar paper from the year 2006 in the subject Economics - Case Scenarios, grade: 1,0, Otto Beisheim School of Management Vallendar, 47 entries in the bibliography, language: English, abstract: Outsourcing is defined here as the geographical split-up of a firm's value chain over national boundaries. It incorporates the procurement of intermediate inputs from a foreign location via imports that either takes place within a firm (intra-firm) or outside the firm in the form of arm's length transactions (inter-firm). Thus outsourcing may (optionally) be accompanied by vertical foreign direct investment. The intermediate inputs**

**receive a value-added in the outsourced stage of the value chain. Subsequently, they require final assembly upon their return to the outsourcing entity. Therefore the phenomenon of outsourcing can be clearly separated from buying raw materials and trading final goods. The paper proceeds as follows: Section 2 relates the characteristics of outsourcing to trade theory. Different theoretical frameworks predicting the effects of outsourcing on factor-prices are presented along with their central assumptions. Additionally, they are put into perspective with regard to a conventional Heckscher-Ohlin framework. In section 3 the model-outcomes are confronted with reality by reviewing relevant empirical studies in the context of outsourcing to Eastern European countries. The findings of the previous sections are then - in section 4 - transformed into suggestions for the political agenda dealing with the labor market challenges resulting from a further EU integration. Section 5, finally, concludes on central insights of the paper and indicates directions for further research.**

**The European Nitrogen Assessment May 07 2020 Presenting the first continental-scale assessment of reactive nitrogen in the environment, this book sets the related environmental problems in context by providing a multidisciplinary introduction to the nitrogen cycle processes. Issues of upscaling from farm plot and city to national and continental scales are addressed in detail with emphasis on opportunities for better management at local to global levels. The five key societal threats posed by reactive nitrogen are assessed, providing a framework for joined-up management of the nitrogen cycle in Europe, including the first cost-benefit analysis for different reactive nitrogen forms and future scenarios. Incorporating comprehensive maps, a handy technical synopsis and a summary for policy makers, this landmark volume is an essential reference for academic researchers across a wide range of disciplines, as well as stakeholders and policy makers. It is also a valuable tool in communicating the key environmental issues and future challenges to the wider public.**
