Advanced Modeling with the MATLAB Reservoir Simulation

Toolbox Oct 12 2020 Many leading experts contribute to this

follow-up to An Introduction to Reservoir Simulation using

MATLAB/GNU Octave: User Guide for the MATLAB Reservoir

Simulation Toolbox (MRST). It introduces more advanced

functionality that has been recently added to the open-source

MRST software. It is however a self-contained introduction to a

variety of modern numerical methods for simulating multiphase

flow in porous media, with applications to geothermal energy,

chemical enhanced oil recovery (EOR), flow in fractured and

unconventional reservoirs, and in the unsaturated zone. The

reader will learn how to implement new models and algorithms in

a robust, efficient manner. A large number of numerical examples

are included, all fully equipped with code and data so that the

reader can reproduce the results and use them as a starting point

for their own work. Like the original textbook, this book will

prove invaluable for researchers, professionals and advanced

students using reservoir simulation methods.

Inequality and the State Feb 02 2020 This book is about inequality, how the State affects distribution through its spending programmes and through taxation, and what the public thinks of these three issues. It describes and analyses one of the biggest social changes in Britain since the Second World War: the dramatic widening of the income distribution since the end of the 1970s, the growth of poverty, and the factors that have driven them. And it examines how government social spending and the taxes that pay for it affect this distribution, and why they take the forms they do. Each part of the discussion is set in the context of public attitudes as revealed by the rigorous and long-running British Social Attitudes survey, and of Britain's position by comparison with other countries. Against this background, the book analyses changes in policy since New Labour came to government in 1997, discusses the impacts of these changes, and looks at the constraints and pressures on future policies, before concluding with a discussion of the dilemmas facing policy-makers as they try to meet competing aims in reducing poverty and inequality, growing demands on social spending, and the constraints and opportunities created by public attitudes.

Measuring and Understanding Coastal Processes Jan 03 2020

Much of the U.S. coastline is rapidly changing—mostly eroding. That fact places increasing pressure on the planners and managers responsible for coastal development and protection, and could have a direct effect on many of the 125 million Americans living within 50 miles of the coast who rely on its resources and beaches for their livelihood or recreation. Although rapid advances have been made in the measurement systems needed to understand and describe the forces and changes at work in the surf-zone environment, their potential for allowing more accurate and reliable planning and engineering responses has not been fully realized. This book assesses coastal data needs, instrumentation, and analyses, and recommends areas in which more information or better instrumentation is needed.

Iconic Communication Nov 12 2020 Our society is becoming a more visual culture day-by-day. This book offers detailed analyses of how to combine words with pictures to communicate clearly across cultural barriers. While some information is better communicated by one kind of media than another, some information is communicated most effectively through a combination of media. This book presents a critical framework within which iconic communication systems can be developed to truly bridge linguistic and cultural gaps and to provide effective computer-based systems for conveying information on a global scale. With valuable insights for the Information and Communication industries, this book draws on the work presented at several conferences on the subject and is designed primarily for graphic designers and human-computer interface developers as well as supplementary reading on degree courses in Information Technology.
