**Reggie-12 Sep 15 2021 Hang out with a young robot hero in his fortress of not-so-solitary solitude What if Osamu Tezuka's beloved hero Astro Boy were a young robot with endless enthusiasm who lived with a bumbling sad sack robot friend, a self-centered wise-cracking cat, and a well-meaning but forgetful inventor? Why, then he'd be Reggie-12! Reggie-12 is classic Japanese adventure manga cartooning reworked in Brian Ralph's trademark style and told with the episodic wit and structure of the contemporary American sitcom. **Y: The Last Man Omnibus Feb 20 2022 Brian K. Vaughn's classic 60-issue post-apocalyptic series is now**

available in this new omnibus. **WINNER OF THREE EISNER AWARDS. A WORLD WITHOUT MEN...** In 2002, the world changes forever. Every man, every boy, every mammal with a Y chromosome everywhere on Earth suddenly collapses and dies. With the loss of nearly half the planet's population, the gears of society grind to a halt, and a world of women are left to pick up the pieces and try to keep civilization from collapsing entirely. The "gendercide," however, is not absolutely complete. For some unknown reason, one young man named Yorick Brown and his pet male monkey, Ampersand, are spared. Overnight, this anonymous twentysomething becomes the most important person on the planet--the key, it is hoped, to unlocking the secret of the mysterious sex-specific plague. For Yorick himself, the most important person on the planet is 10,000 miles away--and he will stop at nothing to find her. In setting off across the post-male landscape, however, man and monkey are about to learn just how valuable they are--both as a prize and as a target. Collected for the first time in a single, comprehensive omnibus, writer Brian K. Vaughan and artist Pia Guerra's Eisner Award-winning Vertigo series *Y: The Last Man* brings to vivid life the age-old speculation: What would really happen to the last man on Earth? Collects *Y: The Last Man* #1-60 and a sketchbook featuring behind-the-scenes art by Pia Guerra.

**Mapping Apologetics** Aug 02 2020 Everyone believes something. But how and why do people believe? What counts as evidence? How much can be assumed or believed by faith alone? When it comes to religious faith, the questions become at once more difficult and more important. Over the centuries, Christians have offered different approaches to explaining or defending the Christian faith, a discipline known as apologetics. But it has not always been clear how different apologetic methods work, or what each approach has to offer. In this comprehensive survey, Brian Morley provides an overview of Christian apologetic approaches and how they differ. He explores the historical and philosophical underpinnings of key figures and major schools of thought, from the presuppositionalism of Cornelius Van Til to the evidentialism of Gary Habermas. Moving beyond theory, Morley also covers apologetic application, demonstrating how each view works out in practical terms. This guide covers the complexities of apologetics in a way that is accessible to the nonspecialist. Even-handed and respectful of each apologist and their contribution, this book provides the reader with a formidable array of defenses for the faith.

**Unequal Treatment Apr 29 2020 Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In Unequal Treatment, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? Unequal Treatment offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. Unequal Treatment will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.**

The final section treats the significance of energetics for population ecology and distribution. Includes a taxonomic as well as subject index. Suitable for advanced students and researchers in the biological and ecological sciences. The Gainesville, FL-based author is referred to by the foreword writer as a keen naturalist, but his credentials are not stated. Annotation copyrighted by Book News Inc., Portland, OR.**
